

A Thank You to President Trump after his first 2 Months in Office (4-5-25)

I wanted to take a minute to thank President Trump and his amazing leadership team as they work to fix the damage created by the previous Administration. While I do not agree with the way President Trump says things at times – I agree with probably 95% of his agenda and actions.

DOGE: How could ANYONE oppose the unveiling of wasted tax dollars, hidden expenditures, and even money laundering – with money allocated ostensibly for one thing but then diverted behind the scenes to a different cause altogether – one that most Americans would not condone. The work of DOGE should be applauded by politicians of both parties! And it would be great if DOGE would also review election procedures and take actions to ensure fair elections – no votes cast by those having no right to vote.

Illegal Immigration: It is interesting to hear speeches made by Liberal politicians not many years ago that passionately opposed open borders, that preached the need for secure our borders, and even that preached the need for elimination of waste in federal spending. (Search for such videos on YouTube by former President Obama and Mrs. Clinton.) Recall the past four years when suddenly (and clandestinely) Liberal politicians changed. They unilaterally encouraged and even assisted illegal entry of our nation. This was not immigration at all – but an invasion. I stated this at the time and will continue to state this – it was an invasion and an act of war against the US. I applaud the deportation efforts, especially of the gang members who entered and began to cause havoc. And to further fuel the fury of Americans, Liberals refuse to prosecute offenders. So they expect us to allow their entry through open borders but then refuse to prosecute them when they commit crimes against US citizens. Appalling!

AND they encouraged (behind the scenes at first) illegal non-citizens to vote, in an attempt to steal an election. How can any with a stitch of common sense think it is EVER appropriate for non-citizens to vote, unless they are wanting to overthrow our free society and impose socialism-leading-to-communism where citizens can be fully under the control of a world agency and its social reform “experts?”

On the illegal immigration/invasion topic, I would propose that if the Liberals truly care about “law abiding” immigrants (aside from their criminal entry) – put forth legislation that would allow them to remain with the following conditions:

- Those who entered illegally would never be permitted to seek US citizenship,
- They would agree never to attempt to vote in any US election or be deported,
- They would not be given financial aid from any US government entity,
- They would be issued a visa that enables them to work in the US but not contribute to or receive Social Security.
- The only aid they could receive aside from working would be voluntary contributions from US donors, or sponsors who agree to provide support – not government aid.

Ineligibility from citizenship or voting rights would ease the minds of many Americans who saw the invasion as an attempt to buy votes and swing an election. This can never happen again!

One final point before moving on. Any politician, bureaucrat, or individual who worked to facilitate illegal entry and registration to vote should be exposed and prosecuted to the full extent of the law. This is nothing short of treason!

Tariffs and the Economy: President Trump is an intelligent man, and he loves this country. He is an astute businessman and skilled in the art of negotiation. With this in mind, let him do his job. If the price of groceries increases in the short term, don’t over-react. Remember this is a long game to fix all that has been badly broken by the previous administration, but the President and his Team will get us there. Tariffs will do their work of equalizing the world economy – something the World Economic Forum cannot accomplish aside from ruling over the world with its fanatical policies. And – President Trump is already bringing business back to America that had moved offshore because of economic policies unfair to our nation.

And remember – do not trust the mainstream news media or any polls they put forth. Experience over the

past 4 years has revealed that they are not an open media at all – but are attempting to steer public opinion. They are NOT to be trusted.

While our President has taken most actions via Executive Orders – I call on the House and Senate to create legislation to give permanence to his actions.

I saw the need to post these thoughts after seeing some Liberal/Socialist posts and mainstream news media that oppose the President at EVERY turn.

And I call on Christian believers to find ways to do good works and to help those that cross our path, but NOT to work toward a political revolution that would take down this nation in favor of any type of socialism, communism, or world government.

I will soon post my thoughts on Globalism and the Bible. But for now I simply say – America has endured as long as it has because of our Republic form of government, free and open speech (even if, at times, it inflames), and yes, even Capitalism which rewards those who are willing to work to support themselves. Give to those not able or not willing to work if you like – but don't bring down this wonderful nation by participating in a clandestine revolution to take it down!
